Volume 3 | November 2026

Seniors' Report 2026

Data Tables

Office of the
SENIORS' ADVOCATE
Newfoundland and Labrador

Contents

Acronyms & Abbreviations 1
0. Demographics 2
1. Individual Health 5
2. Health Care 9
3. Finances 83
4. Housing 102
5. Transportation 106
6. Safety & Protection 109

Note: All tables, charts, and figures are organized by section and listed in the order they appear in the report. Seniors are defined as individuals 65 years of age, or older, unless otherwise specified.

Province/Territory	Abbreviation
Newfoundland and Labrador	NL
Prince Edward Island	PE
Nova Scotia	NS
New Brunswick	NB
Quebec	QC
Ontario	ON
Manitoba	MB
Saskatchewan	SK
Alberta	AB
British Columbia	BC
Yukon	YT
Northwest Territories	NT
Nunavut	NU

Acronyms & Abbreviations

ACE	Acute Care for the Elderly
ADL	Activities of Daily Living
ALC	Alternate Level of Care
APA	Adult Protection Act
CCDSS	Canadian Chronic Disease Surveillance System
CCHS	Canadian Community Health Survey
CHSS	Canadian Health Survey on Seniors
CIHI	Canadian Institute for Health Information
CLSA	Canadian Longitudinal Study on Aging
CMHC	Canada Mortgage and Housing Corporation
CMWF	Commonwealth Fund
COVID-19	Coronavirus Disease 2019
CPI	Consumer Price Index
CPP	Canada Pension Plan
DHCS	Department of Health and Community Services
GIS	Guaranteed Income Supplement
HMP	Home Modification Program
IS	Income Support
LTC	Long Term Care
MCP	Newfoundland and Labrador Medical Care Plan
MINT	Multi-specialty INterprofessional Team
MRD	Motor Registration Division
NACI	National Advisory Committee on Immunization
NL	Newfoundland and Labrador
NLHC	Newfoundland and Labrador Housing Corporation
NLHS	Newfoundland and Labrador Health Services
NLMBM	Newfoundland and Labrador Market Basket Measure
NLPDP	Newfoundland and Labrador Prescription Drug Program
NLSA	Newfoundland and Labrador Statistics Agency
OAS	Old Age Security
OCIO	Office of the Chief Information Officer
OSA	Office of the Seniors' Advocate Newfoundland and Labrador
PCHs	Personal Care Homes
PCRs	Protective Community Residences
PCV	Pneumococcal Vaccine
PHRP	Provincial Home Repair Program
ROI	Return on Investment
RCMP	Royal Canadian Mounted Police
RNC	Royal Newfoundland Constabulary
RSV	Respiratory Syncytial Virus

0. Demographics

Table 0.1: Proportion of Population that are Seniors

Proportion of Population that are Seniors								
	2021	2022	2023	2024	2025	2026	Change: 5 years	Change: last year
Canada	**18%**	**19%**	**19%**	**19%**	**19%**	**20%**	**1.6**	**0.6**

Table 0.3 Urban & Rural Population Aged 65 and Over

Urban & Rural Population Aged 65 and Over								
	2020	2021	2022	2023	2024	2025	Change: 5 years	Change: last year
Census metropolitan area (St. John's)	36,014	37,862	39,599	41,022	42,625	44,382	23.2%	4.1%
Census agglomerations (Grand Falls-Windsor, Gander, and Corner Brook)	13,160	13,600	14,164	14,499	14,907	15,239	15.8%	2.2%
Area outside census metropolitan areas and census agglomerations (Rural and Small Town)	69,296	71,746	73,208	75,245	76,792	78,893	13.8%	2.7%
NL	118,470	123,208	126,971	130,766	134,324	138,514	16.9%	3.1%
% Population Rural (Rural and Small Town)	58.5%	58.2%	57.7%	57.5%	57.2%	57.0%	-2.6%	-0.4%
% Population Urban (Functional Urban Area)	43.2%	43.4%	43.9%	44.0%	44.3%	44.5%	3.0%	0.4%

Notes:
A census metropolitan area (CMA) or a census agglomeration (CA) is formed by one or more adjacent municipalities centred on a population centre (known as the core). A CMA must have a total population of at least 100,000, based on data from the current Census of Population Program, of which 50,000 or more must live in the core based on adjusted data from the previous Census of Population Program. A CA must have a core population of at least 10,000 also based on data from the previous Census of Population Program. To be included in the CMA or CA, other adjacent municipalities must have a high degree of integration with the core, as measured by commuting flows derived from data on place of work from the previous Census Program. All areas inside the CMA or CA that are not population centres are rural areas.

Source: Statistics Canada. Table 17-10-0148-01 Population estimates, July 1, by census metropolitan area and census agglomeration, 2021 boundaries.

1. Individual Health

Table 1.1 Multimorbidity in NL

Multimorbidity in NL								
	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25	Change: 5 years	Change: last year
Percentage of Population With 1 or More Chronic Condition								
0-64	43.1%	42.8%	42.6%	41.9%	41.2%	40.7%	-2.4	-0.5
65+	85.5%	85.3%	85.4%	85.5%	85.2%	85.1%	-0.5	-0.1
All Ages	53.0%	53.0%	53.1%	52.8%	52.4%	52.2%	-0.7	-0.1
Percentage of Population With 2 or More Chronic Conditions								
0-64	16.9%	16.9%	16.8%	16.4%	16.1%	15.9%	-1.0	-0.2
65+	66.8%	66.9%	67.0%	67.1%	66.8%	66.6%	-0.2	-0.2
All Ages	28.5%	28.9%	29.0%	29.0%	29.0%	29.0%	0.5	0.1
Percentage of Population With 3 or More Chronic Conditions								
0-64	6.5%	6.6%	6.5%	6.3%	6.2%	6.1%	-0.5	-0.1
65+	44.1%	44.4%	44.5%	44.4%	44.3%	44.2%	0.1	0.0
All Ages	15.3%	15.6%	15.8%	15.8%	15.8%	16.0%	0.7	0.1

Notes:
Multimorbidity percentages indicate the proportion of individuals having met the Canadian Chronic Disease Surveillance System (CCDSS) case definition for one or more conditions defined by CCDSS (see "CCDSS Case Definitions" tab for details).
CCDSS uses data collected through hospitalization and physician visits. The CCDSS has the limitation that it does not include data on visits to physicians paid by arrangements other than fee-for-service. In Newfoundland and Labrador, approximately two-thirds of general practitioners and specialists are paid on a fee-for-service basis and one-third are paid by salary.
Change in percentage points.

Table 1.2 Wellbeing Indicators for Seniors in NL

Wellbeing Indicators for Seniors in NL								
	2019	2020	2021	2022	2023	2024	Change: 5 years	Change: last year
(percentage of persons)								
Perceived health, very good or excellent	54.8	53.5	53.7	47.2	49.5	45.6	-9.2	-3.9
Perceived health, fair or poor	23.7	23.8	19.4	22.7	23.1	27.1	3.4	4.0
Perceived mental health, very good or excellent	69.2	73.7	72.5	59.5	65.6	66.1	-3.1	0.5
Perceived mental health, fair or poor	5.9	4.3[E]	6.1	7.9	7.5	7.8	1.9	0.3
Perceived life stress, most days quite a bit or extremely stressful	9.3	8.9	8.9	8.9	9.0	10.4	1.1	1.4
Current smoker, daily	7.9	8.2	9.0	9.2	8.5	10.6	2.7	2.1
Heavy drinking[1]	9.1	10.5	11.3	12.1	12.1	12.0	2.9	-0.1
Self-reported physical activity, 150 minutes per week, adult	-	32.1	30.5	-	-	-	-	-
Fruit and vegetable consumption, 5 times or more per day	-	16.2	14.1	-	12.9	-	-	-
Sense of belonging to local community, somewhat strong or very strong	87.3	88.5	88.7	82.0	84.1	84.2	-3.1	0.1
Life satisfaction, satisfied or very satisfied	88.0	91.4	91.1	90.5	88.0	88.4	0.4	0.4

Notes:
Change in percentage points.
A dash "-" indicates data are not available.
[1] Heavy drinking refers to males who reported having 5 or more drinks, or women who reported having 4 or more drinks, on one occasion, at least once a month in the past year.

Table 1.4 Population Diagnosed with Dementia, NL

Population Diagnosed with Dementia, NL								
	2019-20	2020-21	2021-22	2022-23	2023-24	2024-25	Change: 5 years	Change: last year
65+	3.46%	3.41%	3.47%	3.60%	3.73%	3.80%	0.35	0.07

Notes:
The CCDSS uses data collected through hospitalization and physician visits. The CCDSS has the limitation that it does not include data on visits to physicians paid by arrangements other than fee-for-service. In Newfoundland and Labrador, approximately two-thirds of general practitioners and specialists are paid on a fee-for-service basis and one-third are paid by salary.
Age is calculated as of the end of the fiscal year.
The dementia case definition in the CCDSS restricts cases to age 65+, therefore for age 0-64 it is indicated as N/A.
Change in percentage points.

2. Health Care

Table 2.1 Percentage of Seniors with Regular Health Care Provider

Percentage of Seniors with Regular Health Care Provider								
	2019	2020	2021	2022	2023	2024	Change: 5 years	Change: last year
Canada (excluding territories)	**94.3**	**93.9**	**93.6**	**92.8**	**92.0**	**90.9**	**-3.4**	**-1.1**
NL	90.8	92.0	92.2	84.9	83.5	84.0	-6.8	0.5
Prince Edward Island	94.5	93.9	92.0	89.4	85.9	86.8	-7.7	0.9
Nova Scotia	92.4	93.9	91.8	90.4	88.9	89.0	-3.4	0.1
New Brunswick	94.8	95.2	94.5	94.4	90.3	91.4	-3.4	1.1
Quebec	90.6	89.6	90.2	88.3	86.4	83.5	-7.1	-2.9
Ontario	96.6	96.7	95.5	95.5	95.3	95.5	-1.1	0.2
Manitoba	94.9	95.9	94.0	95.0	95.6	95.0	0.1	-0.6
Saskatchewan	92.4	91.5	92.9	94.3	93.5	92.2	-0.2	-1.3
Alberta	95.9	94.0	94.1	95.7	95.8	93.1	-2.8	-2.7
British Columbia	94.1	94.0	94.4	92.1	91.4	90.0	-4.1	-1.4

Notes:
Data for 2020 should be interpreted with caution, as COVID-19 interrupted data collection.
Indicator is based on population aged 65+ who have a health care provider they regularly see or talk to when they need normal care or advice for their health. Beginning in 2022, this indicator is based on a modified version of the question used from 2015 to 2021.

Canada (excluding territories)	**60%**	**65%**	**-**	**62%**	**67%**	**-**	**-**	**-**
NL	55.0%	63.0%	-	68.0%	68.5%	58.3%	3.3%	-10.2%
Prince Edward Island	66.0%	74.0%	-	77.0%	73.7%	69.9%	3.9%	-3.8%
Nova Scotia	72.0%	75.0%	-	75.0%	75.6%	74.6%	2.6%	-1.0%
New Brunswick	61.0%	63.0%	-	71.0%	67.6%	-	-	-

Notes:

A dash "-" indicates data are not available.
Data for 2020 should be interpreted with caution, as COVID-19 interrupted data collection.
Indicator is based on population aged 65+ who reported having their last influenza immunization (flu shot) in the past 12 months. Values are rounded to the nearest whole number.

Due to content changes, data are not available for 2021.

0-64	9.6%	10.7%	9.1%	7.3%	9.2%	-0.4	1.9
65+	28.8%	32.9%	31.3%	27.2%	31.6%	2.8	4.4
All ages	14.2%	16.1%	14.6%	12.4%	15.0%	0.8	2.6

Notes:
1. Pharmacy counts includes prescriptions dispensed from community pharmacies only.
2. Counts include dispenses with a completed or active status. If a prescription requires multiple dispenses, only the prescription for the completion of the vaccination series was included.
3. Age is calculated as of vaccination date.
4. Health zone was assigned using postal code of residence for an individual
5. Campaign years begin on October 1st and end on July 31st.

Notes:
1. Doctor's office and public health clinic vaccinations were identified using a location type of "PH Mass Clinic Site", "Public Health Office", "Refugee Health Collaborative", "Physician Clinic", or were identified as a non-EMR physician.
2. Age is calculated as of vaccination date.
3. Health zone was assigned using postal code of residence for an individual
4. Campaign years begin on October 1st and end on July 31st.

Other	-	33	-

Note:
A dash "-" indicates data are not available.
ACE Unit start dates: Western Memorial Hospital, June 2024. St. Clare's Mercy Hospital, June 2025.
Totals include discharged episodes only. Counts represent episodes and not unique patients; a patient may be admitted to an ACE Unit more than once during the report period.
Cells marked as ".." indicate that, in accordance with privacy guidelines, primary data suppression is used for counts of less than five or secondary data suppression is used to avoid inadvertent disclosure through subtraction.

Alberta	85%	84%	82%
British Columbia	78%	70%	80%
Prince Edward Island	..	96%	..

Notes:
Calculation: This indicator is calculated as the percentage of households receiving home care services in the past 12 months that reported that these services were very helpful in allowing the recipient(s) to stay at home.
Interpretation: A higher number is desirable for this indicator. Lower values may indicate the need for more effective home care services to help recipients stay at home for as long as possible.
Context: For the purposes of this indicator, both privately and publicly funded home care services are included. This includes services received because of a health condition or a limitation in daily activities. It excludes informal help from family, friends or neighbours. Home care services that are unrelated to staying at home are also excluded.
The indicator does not capture people who previously received home care but are no longer at home. This could result in more favourable responses since those for whom home care was not helpful to stay at home may now be living elsewhere.
Cells marked as ".." indicate that, in accordance with privacy guidelines, primary data suppression is used for counts of less than five or secondary data suppression is used to avoid inadvertent disclosure through subtraction.

Notes:
A dash "-" indicates data are not available.
Change in percentage points.
This indicator is calculated as the percentage of newly admitted LTC residents who have a clinical profile similar to the profile of clients cared for at home with formal supports in place.
Cells marked as ".." indicate that, in accordance with privacy guidelines, primary data suppression is used for counts of less than five or secondary data suppression is used to avoid inadvertent disclosure through subtraction.
Interpretation: A low percentage is desirable for this indicator.

Notes:
Change in percentage points.
§ The criteria have been changed as of the publication of the 2021–2022 Quick Stats to also include Alzheimer's disease. As such, this summary metric should not be compared with Quick Stats data from prior to 2021–2022 when it included only the Dementia other than Alzheimer's disease category. Please refer to Table 5 for the full breakdown of health conditions.
** Activities of Daily Living (ADL) Self-Performance Hierarchy Scale ≥1.
†† Cognitive Performance Scale (CPS) ≥3. This criterion has been changed as of the publication of the 2021–2022 Quick Stats. As such, this summary metric should not be compared with Quick Stats data from prior to 2021–2022 when it was reported as CPS ≥1. Please refer to Table 8 for the full breakdown of CPS scores.

Table continues next page.

2.27 Selected Characteristics of Community Home Care Clients, Continued

‡‡ Changes in Health, End-Stage Disease and Signs and Symptoms Scale ≥1.
§§ Depression Rating Scale (DRS) ≥3.
*** Pain Scale ≥2.
††† Method for Assigning Priority Levels Scale ≥4.
Excludes persons who are continent with or without catheter or other urinary collection device (RAI-HC assessment item I1a = 0 or 1, interRAI HC assessment item H1 = 0 or 1).
For information on data sources, definitions, coverage and selection criteria, please refer to the source.
During the COVID-19 pandemic, home care providers temporarily changed assessment practices, and in some cases paused or delayed home care assessments and/or services for home care clients. At the same time, some home care clients placed their services on hold to limit contact with people outside their household. Overall, there was a decrease in the home care data received by CIHI. However, the impact of COVID-19 on the data and derived metrics, including client counts, characteristics and clinical profiles, varies by jurisdiction. Readers are encouraged to interpret results — including comparisons and trends over time — with caution.
2021 includes: Any cognitive impairment (%), Signs of depression (%), and Bladder incontinence (%).

Notes:

A dash "-" indicates data are not available.
There were no clients in 2020–21 and 2021–22 as the program was closed due to COVID-19.
The Neighbourhood: Adult Day Program is offered out of Bishops Gardens. This program is designed as a community oriented environment to support aging adults, while offering respite and peace of mind for caregivers – all while helping participants maintain independence and allowing them to live in their own homes longer.
The Day Program is offered out Saint Luke's Community Living. This program has two separate programs within. The Adult Day Program is offered Mondays, Wednesdays, and Fridays and provides seniors (65+) with opportunities for socialization, recreation, and support services, helping them maintain independence and remain at home longer. The Respite Day Program is offered Tuesdays and Thursdays and is designed for seniors with moderate dementia or impaired social functioning, providing structured activities and support while also giving caregivers a much-needed break.
Both run independently.

Notes:
A dash "-" indicates data are not available.
Data presented here encompasses all individuals, however the vast majority of individuals seeking PCH placement are over the age of 65.
The total is the total average number of clients placed monthly into a PCH. The total is not simply the addition of Community, LTC and Acute Care, clients can also be placed from PCR, emergency department, ALC units, different zones, and difference provinces. While the numbers from these locations is typically smaller they would alter the total number of clients placed monthly.
[1] Calculated at the end of each month.

Notes:
Management of the waitlist is largely based on time waiting with consideration of urgency of need. Priority may be given to individuals with more complex needs.
NA: Not Applicable.

[1]Calculated at the end of each month.

Data encompasses all individuals, however the vast majority of individuals seeking LTC placement are over the age of 65.
Management of the waitlist is largely based on time waiting with consideration of urgency of need. Priority may be given to individuals with more complex needs.

Eastern is the sum of Eastern-Rural and Eastern-Urban

Potentially Inappropriate Use of Antipsychotics	23.1%	22.3%	26.4%	29.4%	31.8%	32.1%	9.0	0.3

Notes:
Adjusted QIs are risk-adjusted to control for resident factors that are likely to be unrelated to quality of care but may impact the QI rate. Risk adjustment provides opportunities for fairer comparisons between different resident populations but cannot be used to find actual frequency. Unadjusted rates are available in the referenced source.
Data reflects facilities with publicly funded/subsidized beds. Results for Newfoundland and Labrador, New Brunswick, Ontario, Saskatchewan, British Columbia and the Yukon reflect full coverage in that province/territory. Results for the remaining provinces/territories are based on partial coverage (i.e., only certain facilities and/or regional health authorities submitted data to CCRS or IRRS). Based on residents who were assessed with the RAI-MDS 2.0 © assessment instrument or the interRAI LTCF © assessment instrument in 2022–2023.

Note:
*Mortality counts and rates for 2022 and 2023 may differ from previously reported values. During this period, the province transitioned from a paper-based death registration process to an electronic death registration system, which affected reporting timelines as well as subsequent processing by Statistics Canada to determine and classify underlying causes of death. Since implementation of the electronic system, the number of deaths with an unknown underlying cause has been substantially reduced as records have been completed and updated. In addition, mortality counts and rates for 2023 were revised using updated mortality data available following year-end closure.

Table 3.7 Maximum Payments for OAS and Related Benefits - July to September 2026

Maximum Payments for OAS and Related Benefits - July to September 2026		
Your Situation	**2025 Annual Net Income**	**Maximum Monthly Payment**
Old Age Security (OAS) pension[1] (65+)		
I am 65 to 74 years old	less than $152,062	up to $751.97
I am 75+	less than $157,923	up to $827.17
Guaranteed Income Supplement (GIS) (65+)		
I am single, widowed or divorced	less than $22,800	up to $1,123.17
I have a spouse/common-law partner who receives a full OAS pension	less than $30,096 (combined income of couple)	up to $676.09
I have a spouse/common-law partner who receives the Allowance	less than $42,144 (combined income of couple)	up to $676.09
I have a spouse/common-law partner who does not receive an OAS pension or Allowance	less than $54,624 (combined income of couple)	up to $676.09
Allowance (60 to 64 years old)		
I have a spouse/common-law partner who receives the GIS and the full OAS pension	less than $42,144 (combined income of couple)	up to $1,428.06
Allowance to the survivor (60 to 64 years old)		
I am a surviving spouse or common-law partner	less than $30,696	up to $1,702.34
Notes: If you lived in Canada for at least 10 years, but less than 40 years (after age 18) you will receive a partial Old Age Security pension. [1] If your income is higher than $93,454 (2025), you will have to repay part or your entire Old Age Security pension. This is called the Old Age Security pension recovery tax.

Table 3.9 Monthly Supplement Amounts for Single Seniors by Province, 2026

Monthly Supplement Amounts for Single Seniors by Province, 2026		
Newfoundland and Labrador	NL Seniors' Benefit	$129.25 Maximum
Prince Edward Island	Seniors Independence Initiative	$150.00 Maximum
Nova Scotia	NA[1]	NA
New Brunswick	New Brunswick Low-Income Seniors' Benefit	$52.42
Quebec	NA[2]	NA
Ontario	Guaranteed Annual Income System	$90.00 Maximum
Manitoba	55 Plus Program	$53.93 Maximum
Saskatchewan	Seniors Income Plan	$360.00 Maximum
Alberta	Alberta Seniors Benefit	$328.83 Maximum
British Columbia	Senior's Supplement	$99.30 Maximum
Yukon	Yukon Seniors Income Supplement	$288.61 Maximum
Northwest Territories	NWT Senior Citizen Supplementary Benefit	$196.00
Nunavut	Senior Citizen Supplementary Benefit	$300.00

Notes:
NA: not applicable.
Amounts are calculated to reflect the amount of each benefit per month.
The Seniors Independence Initiative was introduced in PEI in April 2021 to provide additional support for low-income seniors. Funding is targeted to a suite of services that includes grass cutting, home maintenance, housekeeping, Lifeline Medical Alert System, meal preparation, snow removal and transportation.
[1] Nova Scotia does not have a monthly supplement but offers a tax rebate for GIS clients that is dependent on the amount of tax paid.
[2] Quebec does not have a senior's supplement program but has a senior assistance tax credit program for eligible seniors.

Table 3.12 Provincial Tax Credit Estimated Annual Amounts (2026)

Provincial Tax Credit Estimated Annual Amounts (2026)	
Net Family Income Thresholds	**Annual Amount**
NL Income Supplement (NLIS)[1]	
Up to $15,000	$254 (minimum benefit for single individuals)
	$323 (minimum benefit for couples)
$15,000 - 20,000	Minimum benefit plus $53.20 for every additional $1,000 of net income[2]
$20,000 - 40,000	$520 (maximum benefit for single individuals)
	$589 (maximum benefit for couples)
More than $40,000	Maximum benefit minus $90 for every additional $1,000 of net income[3]
Additional Amounts	
Amount for Individuals Claiming the Disability Tax Credit	$231 (maximum benefit)
	Benefit phases out as income increases.
Amount for Eligible Children	$231 per child
	Benefit phases out as income increases.
NL Seniors' Benefit (NLSB)	
Up to $30,409	$1,882
$30,409 - 46,550	Maximum benefit minus $116.6 for every additional $1,000 of net income[4]

Notes:

[1] These calculations are only for individuals who do not claim any children on their tax return.

[2] Additional $266 phased in at 5.32% for family net income in excess of $15,000 for every dollar. Eligible individuals with family net income of $20,000 to $40,000 will receive the maximum benefit of $520.

[3] Benefit phases out at 9% for every dollar over $40,000.

[4] Benefit phases out at 11.66% as net income increases between $30,409 and 46,550.

Annual Total	$2,367	$2,633	$2,633	$2,633	$2,029	$1,372	$264

Note:
These values are based on the online calculator provided by the provincial government for estimating credit amounts for the NLIS and NLSB. This calculator is available online for your convenience. Reliability of the results depends on the accuracy of the information entered. Actual benefit entitlements will be calculated by the Canada Revenue Agency and determined by the information filed on your personal income tax return. Additionally, these calculations are only for seniors who do not claim any children under the age of 18 on their tax return. Spouses' income was entered as $0.

Notes:
A dash "-" indicates data are not available.
Median refers to the middle number in a group of numbers. Where a median income, for example, is given as $26,000, it means that exactly half of the incomes reported are greater than or equal to $26,000, and that the other half are less than or equal to the median amount. Median incomes in the data tables are rounded to the nearest hundred dollars. With the exception of "Total Income", zero values are not included in the calculation of medians for individuals but are included in the calculation of medians for families.
* Eastern encompasses Eastern Rural and Urban zones.

NL	**131**	**86**	**65**	**35**	**36**	**41**	**7**	**13**	**414**

Note:

All alleged abuse/neglect fields were recorded with either a "Yes" or "No" response with no blank fields. Reports can have more than one alleged abuse/neglect type selected. Therefore, the totals in this tab do not match up with the totals in the APA reports tab. 47% of reports in this time period had "No" responses for all types of alleged abuse/neglect. As a result of this data quality consideration, please interpret with caution. Cell counts less than 5 are suppressed ("..") in accordance with NLHS privacy policies. In addition, secondary suppression is employed in cases where inclusion of the value would allow a censored value less than 5 to be calculated.
